1 Foreword

YY/T 0633-2022 was issued by State Drug Administration on 17 October 2022 and has been in force since 1 October 2023.

It replaces the earlier edition YY/T 0633-2008.

The YY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the minimum requirements and test methods for hand-held, glasses-type and head-mounted indirect ophthalmoscopes for observing indirect fundus images. This standard applies to hand-held, glasses-type and head-mounted indirect ophthalmoscopes. This standard does not apply to condenser lenses and accessories for indirect ophthalmoscopes. This standard does not apply to table-mounted instruments, nor does it apply to ophthalmoscopes primarily used for image capture and/or image processing, such as ophthalmoscopes using scanning laser technology.

YY/T 0633-2022 is filed under Chinese Standard Classification C 40, in the field of medicine, health and labour protection.
